TryHackMe — WiFi Hacking 101

Room link: <https://tryhackme.com/room/wifihacking101>

Using the **aircrack-ng** utility, I cracked the WPA2 handshake from the traffic dump **NinjaJc01-01.cap**, specifying the MAC address of the target access point with the **-b** flag:

```
(kali㉿kali)-[~/Downloads/Captures_1578171018678]
$ sudo aircrack-ng -b 02:1A:11:FF:D9:BD -w /usr/share/wordlists/rockyou.txt NinjaJc01-01.cap
Reading packets, please wait ...
Opening NinjaJc01-01.cap
Read 589 packets.
```

```
Aircrack-ng 1.7

[00:00:32] 129316/14344392 keys tested (3978.00 k/s)

Time left: 59 minutes, 33 seconds                                0.90%
