Each entry should be kept on an individual line. The IP address should be placed in the first column followed by the corresponding host name. # The IP address and the host name should be separated by at least one space. # Additionally, comments (such as these) may be inserted on individual lines or following the machine name denoted by a # symbol. # For example: # 102.54.94.97 rhino.acme.com # source server # 38.25.63.10 x.acme.com # x client host # localhost name resolution is handled within DNS itself. # 127.0.0.1 localhost # ::1 localhost
